

RE-VINYL – 100 % RECYCLING VINYL RECORD

Re-Vinyl is a sustainable alternative to conventional vinyl production. This vinyl record is produced using 100 % recycled materials from our in-house material recovery system. The PVC granulate is obtained by the shredding of edge trimmings and production returns and is free of paper residues and dirt.

Reasons to go with Re-Vinyl

- + Vinyl record made of 100 % recycled PVC
- + Sound quality comparable to coloured vinyl
- + Energy-efficient production with almost complete CO₂ savings for PVC share
- + Active reduction of plastic waste and promotion of global environmental protection
- + Re-Vinyl complies with the current valid DIN standards for industrially produced vinyl records
- + Full-scale production at optimal media for maximum process reliability

Product variants

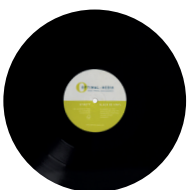

Black Re-Vinyl

- Vinyl record made of 100 % black recycled PVC

Coloured Re-Vinyl

- Vinyl record made of 100 % multi-coloured recycled PVC
- Every vinyl record is one of a kind: the colour composition depends on the raw material available and cannot be selected freely
